

Adaptive Computing Lab

Accessibility Features Opera Web Browser

These features and settings apply to Opera 10 but may also exist in a similar fashion in other versions of Opera.

Go to www.opera.com for more information:

General info on Accessibility <http://www.opera.com/support/access/>

Use Opera Without a Mouse

Keyboard shortcuts

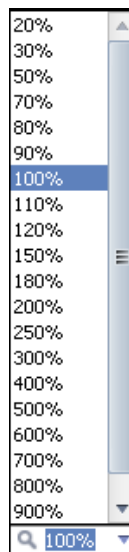

<http://www.opera.com/browser/tutorials/nomouse/>

Voice Control

<http://www.opera.com/browser/tutorials/voice/>

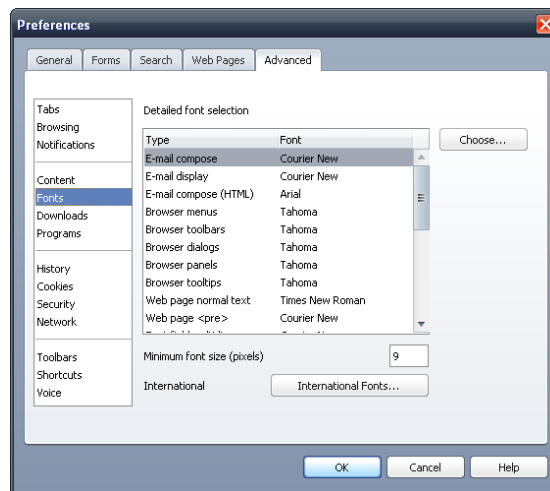

Page Zoom

- Holding down the Control key plus moving the scroll button on the mouse will zoom in or zoom out
- Left click on the magnifying glass icon drop down arrow at the bottom right corner of the web page window. 
- The settings box will allow a zoom in or zoom out on a incremental % basis.

To only change the size of text on a web page:

Tools > Preferences > Advanced > Fonts

You may change the font style, the size, boldness, color, etc. of fonts many different locations in the Opera browser. For example you can change the size of text on a web page or the size of text on a toolbar.

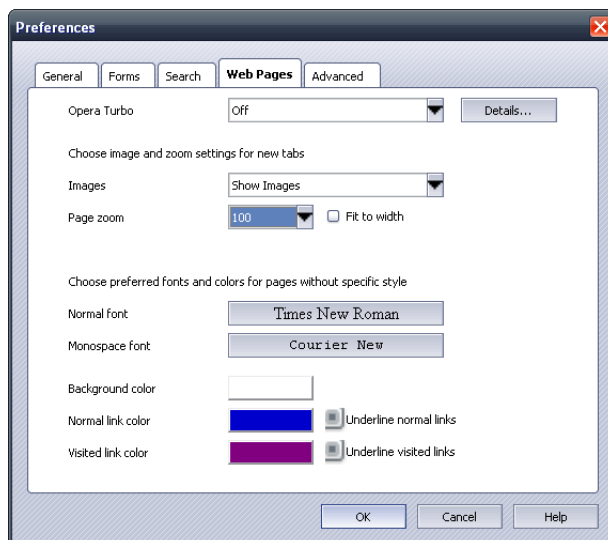

Note: Control key + F12 will take you straight to the Preferences dialog box

Change the appearance of web pages

Tools > Preferences > Web Pages

Here you can control fonts, background colors, link colors, visited link colors, zoom percentages, image presentation, etc.

Note: Control key + F12 will take you straight to the Preferences dialog box

Change the appearance of the Opera browser

Tools > Appearance

Will provide access to four tabs that allow you to change the appearance of Opera skins, panels, toolbars or buttons.

Note: Shift key + F12 will take you straight to the Appearance dialog box
